

Recollections Fifty Years Later

This barn was built by Herschel and Bud Hunt in 1946. Bud [Herschel Maurice] is shown feeding the steers. The barn is located between SR 43 and Prophets Rock Road [the Battle Ground Road] and now just south of I-65. Prior to construction of this barn, the calves were fed in a block garage that was constructed in the early 1940's. These pictures appeared in an extension Beef Manual in use throughout the state for many years. The branded steer came from Fred DeBerard in Colorado.

Feeding Time

This is a picture of the stall in our barn where I have fed my steers for the last two years. My western steer for the feeding year of 1948 is at the trough.
